Kiley Bublitz

(913) 426-8972
kiley.bublitz@gmail.com

A front-end developer with 4 ½ years of experience using React, TypeScript, CSS, and JavaScript, as well as utilizing CSS frameworks to build client ideas into tangible experiences. My goal is to create elegant, intuitive, and functional interfaces and components that enhance the end-user experience.

EXPERIENCE

Crema, Kansas City, MO — *Application Developer I & II*

APRIL 2019 - APRIL 2023

- Developed multiple client-facing, organizational design web software solutions utilizing React, Typescript, and D3 for a Big Three Consulting company
- Worked with multiple teams in the development of large-scale projects with monolithic codebases
- Utilized Storybook to create custom, reusable UI elements for web applications
- Paired closely with test engineers to enhance sprint partnership across craft disciplines and solidify developer norms
- Collaborated closely with designers to give feedback on upcoming features and negotiated design intention with Material UI limitations
- Participated in sprint meetings; provided input on UI considerations, story pointing, and velocity
- Designed, developed, and implemented a training program to grow junior developers throughout the company
- Co-created developer focused content including educational videos on the foundations of React and promotional company videos
- Onboarded new employees as part of "Onboarding Buddy" program
- Co-founded and led employee resource group to support employees before, during, and post leave of absences
- Established and maintained social tool to improve employee engagement and connections during and after company's transition to a remote first environment
- Participated in panel interviews across disciplines for prospective hires

Crema, Kansas City, MO — Application Developer Apprentice

OCTOBER 2018 - MARCH 2019

- Developed and sharpened skill set using Javascript, Typescript, CSS, React, and ReactNative through building a custom application
- Paired with developer mentors to increase knowledge and understanding of fundamental skills and tools
- Participated in a client project and meetings to build familiarity with agile methodologies
- Shadowed individual contributors including developers, designers, test engineers, and product managers to learn the intricacies of each role and the dynamics that created an efficient product team

Ensign Services, Kansas City, KS — Occupational Therapy Assistant

FEBRUARY 2016 - SEPTEMBER 2018

- Contributed to the development of client goals
- Collaborated with interdisciplinary team members to problem solve best approach for treatment
- Provided education during mandatory staff in-services
